Product Management | Data Products | Reporting & Analytics | Azure Databricks & Snowflake | KPI Visualization

Product management and business analysis leader with extensive experience partnering with business stakeholders, data teams, and technology organizations to define data needs, translate requirements into cloud data products, and deliver reporting and analytics solutions using platforms such as Azure Databricks and Snowflake.

Recognized for leading high-profile initiatives, aligning cross-functional teams, improving workflows, and delivering KPI-driven visualizations, dashboards, and data governance practices that support operational decision-making.

Core Competencies: Product Management | Data Product Requirements | Azure Databricks | Snowflake | Cloud Data Sets | Data Governance

Stakeholder Engagement | Business Requirements | Backlog Prioritization | Agile Delivery | Process Improvement | Workflow Analysis

Business Intelligence | Dashboard Design | Reporting & Analytics | KPI Development | Acceptance Criteria | Executive Communication

Experience

OPTUM SERVICES, INC.

Lead Tech Product Manager | Full-time, Remote | Feb 2022 - Present

Lead product management efforts for Data Services & Analytics, partnering with business stakeholders to define data needs, translate business requirements into cloud data sets, and deliver reporting solutions that improve performance visibility.

- Serve as primary liaison between business partners, data warehouse teams, analytics resources, and the data governance office to align priorities, scope, and delivery expectations.
- Translate business objectives into data product requirements, including source data needs, cloud data set design, reporting logic, and acceptance criteria for development teams.
- Partner with technical teams to build and refine cloud-based data sets that support analytics, reporting, and operational decision-making.
- Define and deliver visualizations, dashboards, and KPI reporting to measure performance, identify trends, and support leadership decision-making.
- Lead high-profile data and analytics initiatives by coordinating cross-functional teams, managing stakeholder expectations, and completing product analysis deliverables.
- Created and analyzed workflows to improve user experience, process efficiency, and adoption of analytics tools.
- Developed documentation supporting Snowflake strategy, stakeholder engagement, and data services operating practices.

Lead Business System Analyst | Full-time, Remote | Jun 2018 - Feb 2022

Supported Business Intelligence reporting delivery by managing intake, prioritization, requirements clarification, and reporting workflow improvements for business partners.

- Prioritized report requests and enhancements to support resource planning and business visibility.

- Partnered with business analysts and stakeholders to validate requirements, confirm scope, and assess feasibility.
- Created business requirements and functional specifications for reporting and analytics development teams.
- Reviewed technical design documentation to confirm alignment with business requirements and expected outcomes.
- Supported Tableau policy and procedure development to strengthen reporting governance and consistency.
- Analyzed ServiceNow workflows and recommended updates to improve user experience, routing, and process efficiency.

Whataburger

IT Business Analysis Manager | San Antonio, Texas Metropolitan Area | Nov 2016 - Jun 2018

Managed business analysis practices across IT, helping teams translate business priorities into clear requirements, product backlogs, and delivery plans.

- Implemented estimation and artifact standards to improve planning accuracy, budget visibility, and delivery readiness.
- Created processes for requirements review, validation, and SDLC support across business, development, and QA teams.
- Trained resources on Team Foundation Services for backlog organization, Excel-based reporting, and requirements traceability.
- Expanded use of mockups and visual requirements to improve stakeholder alignment before development.
- Supported Agile digital delivery by coordinating backlog grooming and product backlog management practices.
- Coached team members on business analysis practices, delivery expectations, and cross-functional collaboration.

OPTUM SERVICES, INC.

Senior Business System Analyst | San Antonio, Texas Metropolitan Area | Nov 2014 - Nov 2016

Supported analytics product delivery for BI reporting by converting business needs into actionable requirements and coordinating delivery across business, development, and testing teams.

- Defined reporting requirements, scope, and acceptance expectations for assigned BI and analytics initiatives.
- Reviewed technical designs and test outputs to ensure reporting solutions met business intent.
- Provided ServiceNow-based performance metrics to support management visibility and operational decision-making.
- Coordinated code review and unit testing for a data warehouse project that achieved 98% delivery within deadline.
- Supported ICD-9 to ICD-10 reporting conversion with zero reported production errors.
- Partnered with stakeholders to prioritize reporting updates and keep delivery aligned to budget and scope.

Clear Channel Communications

Business Analyst / Project Manager | San Antonio, Texas Metropolitan Area | Apr 2013 - Nov 2014

Helped drive digital product delivery by defining requirements, managing backlog health, and coordinating cross-functional project execution for the digital outdoor business.

- Converted business needs into requirements and functional specifications for multiple digital initiatives.
- Reviewed technical design documents and test cases to confirm alignment with expected functionality.
- Improved backlog quality by reducing duplicate and misrouted items by 30%.
- Coordinated project estimates, timelines, plans, change documentation, and governance materials.
- Collaborated with delivery leads to support transition toward Agile development practices.
- Partnered with operations teams to transition support responsibilities to an external vendor.

Robert Half Technology

Contractor | San Antonio, Texas | Jan 2011 - Apr 2013

Supported client technology initiatives by combining business analysis, project coordination, data migration, and stakeholder communication across multiple environments.

- Documented business requirements, process flows, project timelines, and task plans for client initiatives.
- Facilitated requirements sessions with stakeholders and subject matter experts to define scope and business needs.
- Exported COBOL-based data into SQL databases and created SSIS import jobs to support migration activities.
- Performed data analysis and reviewed system designs to recommend efficient implementation approaches.
- Developed executive-facing presentations, mockups, and process flows to align leadership and SMEs on application scope.

Valero Energy Corporation

Retail Accounting Systems Project Manager | San Antonio, Texas | Mar 1998 - Nov 2010

Managed retail accounting system projects, reporting solutions, and process automation initiatives supporting enterprise financial operations.

- Automated 90% of manual accounting processes through database design, workflow improvements, and reporting enhancements.
- Delivered \$250K COBOL-to-SQL/.NET accounting application migration with SAP integration.
- Created and distributed operational reporting for management across multiple business levels.
- Developed training environment and materials for nationwide time-entry implementation supporting 10K employees.
- Managed stakeholder relationships through one-on-one meetings, formal presentations, and cross-functional coordination.

Education

The University of Texas at San Antonio

Bachelor of Arts (BA), Human Resource Management
1989 - 1993
