Lead Technical Product Manager — Data Products, Reporting & Analytics

Product leader who owns roadmap, backlog, and delivery for enterprise cloud data products on Azure Databricks and Snowflake. Shipped the Transition of Care dashboard, which moved the organization from lagging claims data to leading ADT and authorization data — cutting reporting lag from 45 days to 2 and supporting \$5M in additional savings. Partner with 20+ stakeholders across business, data warehouse, analytics, and governance teams to turn needs into shipped products.

SKILLS

Data Product Roadmaps · Backlog Creation & Prioritization · Requirements Definition & Acceptance Criteria · Azure Databricks · Snowflake · Tableau · Enterprise Data Sets · Data Governance · KPI Development · Dashboard Design · Agile Delivery · Stakeholder Engagement · Executive Communication

EXPERIENCE

OPTUM SERVICES, INC.

Lead Tech Product Manager

Full-time, Remote · Feb 2022 – Present

- Own the data product roadmap for Data Services & Analytics, plus a dedicated product roadmap for the Transition of Care dashboard.
- Delivered the Transition of Care dashboard, the first product to move the organization from lagging claims data to leading ADT and authorization data: reporting lag fell from 45 days to 2, and coverage widened from patients with approved claims to all patient visits. Supports \$5M in additional transition of care savings.
- Consolidated 30+ SSRS reports into 2 dashboards on a shared enterprise data set, eliminating duplicate report maintenance and giving stakeholders one governed source for the same questions.
- Lead the team defining the enterprise data sets behind the portfolio; those sets now feed at least three additional dashboards and are subscribed to by teams across IT and the business.
- Own backlog creation and prioritization across the data product portfolio, sequencing work against stakeholder impact and delivery capacity.
- Serve as primary liaison across 20+ stakeholders spanning business partners, data warehouse teams, analytics resources, and the data governance office.
- Translate business objectives into data product requirements: source data needs, cloud data set design, reporting logic, and acceptance criteria.
- Authored documentation establishing Snowflake strategy, stakeholder engagement, and data services operating practices.

Lead Business System Analyst

Full-time, Remote · Jun 2018 – Feb 2022

- Managed Business Intelligence reporting intake and prioritization, supporting resource planning and business visibility across partner teams.
- Created business requirements and functional specifications for reporting and analytics development teams; reviewed technical designs against business intent.
- Developed Tableau policy and procedure standards that strengthened reporting governance and consistency.
- Analyzed and improved ServiceNow workflows, tightening routing and reducing process friction for requesters.

Whataburger

IT Business Analysis Manager

San Antonio, TX · Nov 2016 – Jun 2018

- Managed business analysis practice across IT, translating business priorities into requirements, product backlogs, and delivery plans.

- Implemented estimation and artifact standards that improved planning accuracy, budget visibility, and delivery readiness.
- Supported Agile digital delivery through backlog grooming and product backlog management practices.
- Coached analysts on requirements practice, visual mockups, and cross-functional collaboration.

OPTUM SERVICES, INC.

Senior Business System Analyst

San Antonio, TX · Nov 2014 – Nov 2016

- Defined reporting requirements, scope, and acceptance expectations for BI and analytics initiatives.
- Coordinated code review and unit testing for a data warehouse project that achieved 98% delivery within deadline.
- Supported ICD-9 to ICD-10 reporting conversion with zero reported production errors.
- Provided ServiceNow-based performance metrics to support management visibility and operational decision-making.

Clear Channel Communications

Business Analyst / Project Manager

San Antonio, TX · Apr 2013 – Nov 2014

- Defined requirements and functional specifications for digital outdoor product initiatives.
- Improved backlog quality by reducing duplicate and misrouted items by 30%.
- Coordinated estimates, timelines, change documentation, and the transition toward Agile delivery practices.

EARLIER EXPERIENCE

Robert Half Technology — Contractor, San Antonio, TX · 2011 – 2013

Business analysis, project coordination, and COBOL-to-SQL data migration with SSIS import jobs for client technology initiatives.

Valero Energy Corporation — Retail Accounting Systems Project Manager, San Antonio, TX · 1998 – 2010

Automated 90% of manual accounting processes and delivered a \$250K COBOL-to-SQL/.NET migration with SAP integration; built the training environment for a nationwide time-entry rollout to 10,000 employees.
